

**CONTRACT DATA REQUIREMENTS LIST
FOR NEXT GENERATION JAMMER
TECHNOLOGY DEVELOPMENT**

Version 1.0

Prepared by

PEO(T) / PMA234

Contract Data Requirements List (CDRL)

Data Item Number	Title of Data Item	Subtitle
AC01	Cost Data Summary Report	Contractor Cost and Software Data Reporting (CSDR)
AC02	Functional Cost Hour Report	Contractor Cost and Software Data Reporting (CSDR)
AC03	Progress Curve Report	Contractor Cost and Software Data Reporting (CSDR)
AC04	Business Data Report	Contractor Cost and Software Data Reporting (CSDR)
AC05	Contract Work Breakdown Structure (CWBS)	Contractor Cost and Software Data Reporting (CSDR)
AC06	Software Resources Data Report: Initial Developer Report	Contractor Cost and Software Data Reporting (CSDR)
AC07	Software Resources Data Report: Final Developer Report	Contractor Cost and Software Data Reporting (CSDR)
AC08	Life Cycle Cost and Independent Schedule Assessment Report	System Life Cycle Cost Estimate and Model
AE01	Systems Engineering Management Plan (SEMP)	-
AE02	Producibility Analysis Report	-
AE03	Status Report	Engineering Status Report
AE04	Scientific and Technical Reports	Integrated Verification Plan
AE05	Conference Minutes	HSI Working Group
AE06	Conference Minutes	Computer Resources Working Group
AE07	Test Plan/Test Procedures	Acceptance Test Procedures for Pod Message Simulator
AE08	Hazardous Materials Management Program (HMMP) Report	HMMP/Pollution Prevention (P2) Report
AE09	Hazardous Materials Management Program (HMMP) Plan	HMMP/Pollution Prevention (P2) Plan
AE10	System Safety Program Plan	-
AE11	Scientific and Technical Reports	Metrics Management Plan
AE13	Safety Assessment Report (SAR)	-
AE14	Human Engineering Design Approach Document-Maintainer (HEDAD-M)	Human Engineering Program
AE15	Scientific and Technical Reports	Human Engineering Task Analysis/Task Allocation Report
AE16	Technical Report – Study/Service	Integrated Architecture Report
AE17	Technical Report – Study/Service	Integrated Architecture Model
AE18	Scientific and Technical Reports	DoD Architecture Framework Documentation
AE21	Conference Minutes	System Engineering Technical Review Conduct
AE22	Contractor's Configuration Management Plan	Data Management Plan
AE24	Specification Change Notice (SCN)	Proposed Specification Change Notice (PSCN)
AE26	Technical Report – Study/Services	Requirements Database
AE27	Technical Report – Study/Services	Systems Requirements Verification Matrix
AE28	Management Plan	Open System Management Plan (OSMP)

Controlled Unclassified Information (CUI)

Data Item Number	Title of Data Item	Subtitle
AE29	Technical Report – Study/Services	Modular Open System Approach Analysis Report
AE32	Electromagnetic Interference Control Procedures (EMICP)	Electromagnetic Environmental Effects and Spectrum Management Control
AE33	Technical Report – Study/Services	Thermal Design Report
AE34	Technical Report – Study/Services	Fastener Usage Guidelines
AE35	Technical Report – Study/Services	Preliminary Design of Mechanisms and Utility Actuation Systems
AE36	Technical Report – Study/Services	Power Generation Analysis Report
AE39	Quality System Plan	Quality Assurance Program
AE41	Scientific and Technical Reports	Mass Properties Control and Management Plan (MPCMP) Report
AE42	Scientific and Technical Reports	Master Event Spectrum
AE43	Parts List	Critical Application Items Indentured Parts Breakdown
AE44	Management Plan	Nondestructive Testing and Inspection Program Plan
AE45	Management Plan	Material and Process Specification Plan
AE46	Detail Specification Documents	Material and Process Specifications
AE47	Scientific and Technical Reports	Materials and Processes List
AE48	Test Plan	Materials and Process Substantiating Data and Analysis Test Plan
AE49	Technical Report - Study/Services	Materials and Process Substantiating Data and Analysis Report
AE50	Corrosion Prevention and Control Plan	-
AE51	Finish Specification Report	-
AE52	Human Engineering Program Plan	Human Engineering Program Plan-
AE55	Test/Inspection Report	Thermal Analysis Report
AE58	Reliability Test Plan	-
AE60	Software Development Plan	-
AE61	Technical Report – Study/Service	Software Architecture
AE62	Technical Report – Study/Service	Software Estimation Process
AE63	Software Requirements Specification (SRS)	-
AE64	Interface Requirements Specification (IRS)	-
AE65	Interface Design Description (IDD)	-
AE66	Software Design Description (SDD)	-
AE71	Management Plan	Reliability Program Plan
AE73	Scientific and Technical Reports	Environmental Effects Analysis Plan
AE75	Parts Management Plan	-
AE76	Scientific and Technical Reports	Reliability Allocation Report
AE77	Reliability Prediction and Documentation of Supporting Data	Reliability Predictions Report
AE78	Failure Mode Effects, and Criticality Analysis Report	-

Data Item Number	Title of Data Item	Subtitle
AE79	Maintainability Predications Report	-
AE80	Scientific and Technical Reports	Thermal Analysis Mesh Files
AE81	Management Plan	Reliability Maturation Plan
AE85	Scientific and Technical Reports	Prototype Design Allocation Report
AE87	Scientific and Technical Reports	Prototype Design Documentation
AE90	Software Product Specification	Concept Demonstrator Design Software Product Specification
AE91	Software Version Description	Prototype Software Version Description
AE92	Scientific and Technical Reports	Prototype Design Correlation Analysis
AE101	Scientific and Technical Reports	Loads Analysis Report
AE105	Conference Minutes	Interface Control Working Group
AE108	Scientific and Technical Reports	Preliminary Specification Tree
AE111	System/Subsystem Specification (SSS)	Baseline Specifications
AE114	Management Plan	Mishap/Incident Response Plan
AE115	Maintainability Program Plan	-
AE117	Maintainability/Testability Demonstration Test Plan	Maintainability, Prognostics and Health Management, and Built in Test Demonstration Plan
AE118	Technical Report – Study/Services	Maintainability Analysis Report
AE119	Scientific and Technical Reports	Mass Properties Status Report
AE120	Technical Report – Study/Services	Built in Test Description Document
AE126	Test Plans/Test Procedures	Store Separation Wind Tunnel Test Plan
AE127	Scientific and Technical Reports	3-D CAD MODELS (Store Separation)
AE128	Scientific and Technical Reports	Store Separation Test and Analysis Report
AE133	Scientific and Technical Reports	NGJ Predicted Electromagnetic Environment
AE134	Management Plan	Manufacturing Readiness Assessment Plan
AE135	Management Plan	Manufacturing Maturity Plan (MMP)
AE136	Management Plan	Reliability Centered Maintenance Plan
AE137	Scientific and Technical Reports	Estimated Mass Properties Report (EMPR)
AE138	Scientific and Technical Reports	Technology Maturity Assessment (TMA) – TD Phase Technical Work Breakdown Structure (TWBS) with embedded Technology Maturation Plan (TMP) Updates
AE140	Scientific and Technical Reports	Structures Drawings and Models
AE141	Scientific and Technical Reports	Structural Analysis
AE142	Scientific and Technical Reports	Computational Electromagnetic Modeling
AE143	Scientific and Technical Reports	FRACAS Database
AE144	Scientific and Technical Reports	Aviation Ship Integration Report
AE145	Software Product Specification	Pod Message Simulator Software

Data Item Number	Title of Data Item	Subtitle
AE146	Software User Manual	Pod Message Simulator Software User Manual
AE147	Scientific and Technical Reports	Laboratory Integration Support Plan (LISP)
AE149	Conference Minutes	Jammer Systems Working Group (JSWG)
AE150	Software Test Plan (STP)	NGJ System Software Test Plan
AE151	Management Plan	Requirements Management Plan (RMP)
AE152	Scientific and Technical Reports	Array and Beam Forming Subsystem Prototype Analysis
AE153	Scientific and Technical Reports	Preliminary Detailed Functional Description Document Package (DFDDP) Data
AE154	Conference Minutes	Data Review Conference (DRC) Minutes
AL02	Scientific and Technical Reports	Contractor Life Cycle Sustainment Plan (CLCSP)
AL03	Scientific and Technical Reports	Supportability Analysis Plan (SAP)
AL05	Conference Minutes	Supportability Guidance Conference/Logistics Product Data Review Meeting Minutes
AL07	Conference Minutes	Product Support Meeting Minutes
AL09	Scientific and Technical Reports	Candidate Item List (CIL)
AL10	Logistics Product Data Summaries	Task Analysis Summary
AL11	Logistics Product Data Summaries	Maintenance Plan (MaPl) Summary
AL12	Logistics Product Data Summaries	Support Equipment Candidate List (SECL) Summary
AL14	Logistics Product Data Summaries	Navy Packaging Summary
AL15	Logistics Product Data Summaries	Training Task List Summary
AL16	Logistics Product Data Summaries	Manpower, Personnel and Training Summary
AL17	Scientific and Technical Reports	Support Equipment Program Plan (SEPP)
AL18	Training Situation Document	NGJ Training Situation Document (TSD)
AL19	Facilities Requirements Data (FRD) Development for Typical Shore Based and Shipboard Sites	Electronic Facilities Requirements Data (eFRD)
AL20	Technical and Management Work Plan	Item Unique Identification (IUID) Implementation Plan
AL23	Scientific and Technical Reports	Supportability Test & Evaluation (ST&E) Assessment Plan
AL24	Scientific and Technical Reports	Level of Repair Analysis (LORA) Report
AL25	Logistics Product Data	Logistics Data Product Repository Database/ Logistics Product Data (LPD) Database
AL26	Scientific and Technical Reports	Level of Repair Analysis (LORA) Model Input Data
AM01	Management Plan	Subcontractor Management Plan (SMP)
AM02	Conference Minutes	Program Management Review Minutes

Data Item Number	Title of Data Item	Subtitle
AM03	Scientific and Technical Reports	Data Accession List (DAL)
AM05	Technical Report – Study/Services	Risk and Opportunity Management Plan
AM06	Scientific and Technical Reports	Risk and Opportunity Quarterly Management Database Report
AM07	Design-To-Cost/Life Cycle Cost and Variance Analysis Report	
AM08	Contract Performance Report (CPR)	Integrated Performance Management
AM09	Integrated Master Schedule	IMS with Internal Schedule Risk Assessment
AM10	Contract Funds Status Report (CFSR)	-
AS01	Program Protection Implementation Plan (PPIP)	Protection of Essential Program Information
AS02	Operations Security (OPSEC) Plan	System Security
AS03	Management Plan	Anti-Tamper Plan
AT01	Test and Evaluation Program Plan (TEPP)	Contractor Master Test and Evaluation Plan
AT02	Test Plan	-
AT03	Test/Inspection Report	Test Report
AT04	Scientific and Technical Reports	Problem Tracking Database
AT05	Conference Minutes	Integrated Test Team Meeting Minutes

CONTRACT DATA REQUIREMENTS LIST (CDRL) (1 Data Item)					Form Approved OMB No. 0704-0188				
<p>The public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please do not return your form to the above organization. Send completed form to the Government Issuing Contracting Officer for the Contract/PR No. listed in Block E.</p>

<p>16. REMARKS</p> <p>Block 8 – Block 6 is the approval code.</p> <p>Prepare Blocks 10 through 13 in accordance with the OSD Deputy Director, Cost Assessment (DDCA)-approved Cost and Software Data Reporting (CSDR) Plan provisions, the WBS Data Dictionary, and the CSDR Manual (DoDM 5000.04-M-1). The CSDR Plan is included as contract attachment 6. The CSDR Manual is available from the Defense Cost and Resource Center (DCARC) Web site at http://dcarc.pae.osd.mil.</p> <p>Contractors shall be required to submit CSDR reports at frequencies specified in the OSD DDCA-approved CSDR plan and in the contract. All CSDR reports shall be submitted electronically using the CSDR Submit-Review System in accordance with the detailed instructions contained in Data Item Description DI-FNCL-81565C, or the most current version, and CSDR Manual. The CWBS Index and Dictionary must be submitted in Microsoft Word-compatible files. Data submitters must register through the DCARC website and possess a DoD-issued CAC or DoD-approved ECA digital certificate to obtain a DCARC Portal account and be authorized to upload CSDR content. Users can obtain access by submitting user information about themselves and their organizations to the DCARC Portal and requesting a CSDR submitter user role. After the registration information has been verified, the DCARC shall authorize the user account and requested roles. DCARC Portal users with a DoD-issued CAC shall be able to register their CAC with their DCARC Portal account, enabling CAC login. All DCARC Portal accounts need to be renewed at least annually. Prime contractors are responsible for flowing down CSDR requirements contained in their prime contracts to all subcontractors who meet the reporting thresholds. This includes requiring subcontractors to electronically report directly to the DCARC.</p> <p>Subcontractor Reporting. The prime contractor shall be required to flow-down CSDR requirements to all subcontractors at all tiers that meet reporting thresholds. Depending upon the specific contractual relationship, prime contracts and subcontracts may have similar requirements regarding report type, frequency, and method of transmission. The prime contractor shall be required to work with the CWIPT and all appropriate subcontractors to prepare separate subcontract CSDR plans for submission to the DCARC for DDCA approval using the CSDR Submit-Review System.</p> <p>In addition to above instructions, deliver one (1) digital data copy in Microsoft Excel for Windows format on CD-ROM media to: Department of Navy Naval Air Systems Command 47254 Davis Spur Road Patuxent River, MD 20670 Attn: 4.2.1.4 Division / PMA-234 Cost Team</p>					AIR 4.2		0	1	0

16. REMARKS Block 8 – Block 6 is the approval code. Contractors shall be required to submit 1921-3 Contractor Business Data Report on an annual basis within 60 days subsequent to the end of the contractor's fiscal year for the life of the contract. Only one report is required to be completed and submitted by each FPR (Forward Pricing Rate) unit (e.g., plant, site, business unit) per year, independent of the number of contracts within the FPR unit which contain this CDRL item. In the absence of a FPR requirement, the term "FPR unit" should be interpreted for reporting purposes as "business unit" as defined in the FAR. The Defense Cost and Resource Center (DCARC) is responsible for administration of this requirement. The DCARC website is located at http://dcarc.pae.osd.mil . All 1921-3 reports shall be submitted electronically using the CSDR Submit-Review System in accordance with the detailed instructions contained in Data Item Description DI-FNCL-81765B, or the most current version, and CSDR Manual. Data submitters must register through the DCARC website and possess a DoD-issued CAC or DoD-approved ECA digital certificate to obtain a DCARC Portal account and be authorized to upload CSDR content. Users can obtain access by submitting user information about themselves and their organizations to the DCARC Portal and requesting a CSDR submitter user role. After the registration information has been verified, the DCARC shall authorize the user account and requested roles. DCARC Portal users with a DoD-issued CAC shall be able to register their CAC with their DCARC Portal account, enabling CAC login. All DCARC Portal accounts need to be renewed at least annually. The Contractor Business Data Report is to be prepared by and for the business entity (e.g., plant, site, or business unit) responsible for submitting the Forward Pricing Rate Proposal (FPRP) representing the basis for Forward Pricing Rate Agreement (FPRA) negotiations with the Government. This business entity is referred to as the "FPR unit" in the Contractor Business Data Report and in the remainder of this DID. In the absence of a FPR requirement, the term "FPR unit" should be interpreted for reporting purposes as "business unit" as defined in the FAR. Reports are to be submitted annually, within 60 days subsequent to the end of the contractor's fiscal year. The data requested in Sections A and B must be provided for the Prior Year, for the Current Year, and for Future Years. "Current Year" refers to the company's most recently completed fiscal year. "Prior Year" is the year preceding the Current Year, and "Future Year" is any year subsequent to the Current Year. For purposes of this report, submit actual costs for the Current Year and the Prior Year. Submit estimated costs for all Future Years. In addition to above instructions, deliver one (1) digital data copy in Microsoft Excel for Windows format on CD-ROM media to: Department of Navy Naval Air Systems Command 47254 Davis Spur Road Patuxent River, MD 20670 Attn: 4.2.1.4 Division / PMA-234 Cost Team					AIR 4.2		0	1	0

16. REMARKS <p>Block 8 – Block 6 is the approval code.</p> <p>Prepare Blocks 10 through 13 and the CWBS in accordance with DI-MGMT-81334D (most recently approved version), the CSDR Manual (DoDM 5000.04-M-1), and the OSD Deputy Director, Cost Assessment-approved contract CSDR Plan. The CSDR Manual is available from the Defense Cost and Resource Center (DCARC) website at http://dcarc.pae.osd.mil.</p> <p>Contractors shall be required to submit CSDR reports at frequencies specified in the OSD DDCA-approved CSDR plan and in the contract. All CSDR reports shall be submitted electronically using the CSDR Submit-Review System in accordance with Data Item Description DI-MGMT-81334D, or the most current version, and the CSDR Manual. The CWBS Index and Dictionary must be submitted in Microsoft Word-compatible files. Data submitters must register through the DCARC website and possess a DoD-issued CAC or DoD-approved ECA digital certificate to obtain a DCARC Portal account and be authorized to upload CSDR content. Users can obtain access by submitting user information about themselves and their organizations to the DCARC Portal and requesting a CSDR submitter user role. After the registration information has been verified, the DCARC shall authorize the user account and requested roles. DCARC Portal users with a DoD-issued CAC shall be able to register their CAC with their DCARC Portal account, enabling CAC login. All DCARC Portal accounts need to be renewed at least annually.</p> <p>In addition to above instructions, deliver one (1) digital data copy in Microsoft Excel for Windows format on CD-ROM media to:</p> <p style="margin-left: 40px;">Department of Navy Naval Air Systems Command 47254 Davis Spur Road Patuxent River, MD 20670 Attn: 4.2.1.4 Division / PMA-234 Cost Team</p>				AIR 4.2		0	1	0

<p>Block 4: The contractor shall provide the Life Cycle Cost (LCC) per DID DI-FNCL-80448 except or as modified by the following:</p> <ul style="list-style-type: none"> Modify paragraph 3.1 to read "Provides the government with LCC in the Work Breakdown Structure (WBS) and Cost Assessment and Program Evaluation (CAPE) structure for an Electronic System 90 days prior to each milestone and on an annual basis. The report also depicts a cost risk assessment. The report will be reconciled with the Government independent cost estimates (ICE)." Modify paragraph 7.2 to read "DOD 5000.4M requires an Independent Cost Analysis (ICA) be developed by an independent team using independent methodology for each system subject to Defense Acquisition Board (DAB) review or designated for a budget ICA." Delete paragraph 10.2.7 to read "The estimate results section shall contain the contractor's cost estimate in base year dollars by the WBS listed in the assumption section. All costs should be fully burdened with overhead, G&A and fee in base year dollars. The costs shall be shown for all phases of the program, Research and Development, Investment (Production), Operations and Support (O&S) and Disposal unless otherwise specified. Actual cost shall be used upon phase completion. In addition, a summary level time phased estimate shall be submitted for Research and Development (Technology Development and Engineering Manufacturing Development phases), Production, and O&S." Paragraph 10.2.8, Schedule Assessment Results, is not required to be provided. Modify paragraph 10.2.9 to read "The conclusion section is for the contractor's cost analysis to communicate findings to the Government. This section shall mention cost of alternative designs, trade studies, potential cost reduction initiatives, pending engineering changes, and accuracy or confidence levels (S-Curve) of the results section." Modify paragraph 10.3 to read "The LCC breakout shall follow DOD 5000.4-M, DOD Cost Analysis Guidance and Procedures, guideline which provide standardized definitions of cost terms that in total comprise system Lifecycle costs." <p>Block 10, 11, 12, & 13: The initial submission is required electronically 90 days following contract award. Subsequent submissions shall be required electronically at the System Functional Review (SFR), Preliminary Design Review (PDR), and 30 days prior to the end of the period of performance of the contract. The LCCE shall be briefed at all Program Management Reviews throughout the duration of the contract.</p> <p>Block 14: In addition to above instructions, deliver one (1) digital data copy in Microsoft Excel for Windows format on CD-ROM media to:</p> <p style="margin-left: 40px;">Department of Navy Naval Air Systems Command 47254 Davis Spur Road Patuxent River, MD 20670 Attn: 4.2.1.4 Division / PMA-234 Cost Team</p>						AIR 4.2		0	1	0

<p>16. REMARKS</p> <p>Blocks 10, 12 and 13: Submit draft report 60 days prior to SFR, SSR and PDR. Submit final report 30 days after receipt of Government comments</p> <p>Block 14: All data shall be delivered to all addressees identified in Block 14 in electronic media and format compatible with Microsoft Office 2007 for Windows. Unclassified data accepted via the Government Team SharePoint VWE/CDE per the Statement of Work (SOW) constitutes delivery and individual addressing is not required. In addition, deliver one electronic (e.g. CD ROM) and one paper copy of any classified information to PMA 234.</p> <p>Block 4: The DoDAF integrated architecture shall be developed and provided to the Government in a format compliant with IBM Rational Software Architect/Jazz tool suite or other mutually agreed to product. The architecture products shall contain OMG standard XML or Data Metadata so that they can be imported between the various architect tools (e.g., Rational Software Architect or System Architect). The contractor shall provide access to the DoDAF integrated architecture tool and the architecture database to Government personnel to include licenses and training if required. The Contractor shall use the Government DoDAF architecture as an initial baseline and shall provide the following updated or developed architecture views AV-1, AV-2, OV-1, OV-2, OV-3, OV-4, OV-5, OV-6c, CV-1, CV-3, CV-4, CV-6, SV-1, SV-2, SV-4, SV-5, SV-6, SV-10c, StdV-1, StdV-2, DIV-2, and DIV-3 as determined by the Government. The developed DoDAF products shall be traceable to the system specification, using the compliant architecting tool and integrated requirements management tool (e.g. Rational® DOORS®). The developed DoDAF products shall be delivered in accordance with the current version of DoDAF 2.0. In addition, the developed DoDAF products shall capture the behavior of the weapon system to verify interoperability and system data exchanges following the processes identified in the SEP for linkages and traceability. The behavior shall be captured in sufficient detail to generate simulations and executable models of each individual subsystem of the weapon system, and the weapon system as a whole. The architecture shall address the system and subsystems to include weapon system Support System, Mission Payload, Communication Suite, Modeling and Simulation, as well as all external interfaces, nodes, systems or activities in a System-of-System (SoS) environment.</p> <p>The weapon system DoDAF products shall be made available in Microsoft Office format. In addition, the weapon system DoDAF source files shall be delivered at each submission.</p>					AIR-4.1.18		3	3	0

16. REMARKS Block 4: Contractor format is acceptable. All changes made since the previous submittal of the document shall be marked (e.g. revision history and revision bars). The report shall contain a description of the materials used on the NGJ, including metals (alloy, heat treatment/strength condition, product form), polymers, composites, adhesives, and organic and inorganic finish systems. For avionics construction, the materials descriptions shall include only connectors, conformal coatings, gaskets, sealants, finish systems, and housings. Part nomenclature, categorized by material type and part construction (e.g., castings, forgings, sheet, sandwich construction, etc.) shall be included within the description. The report shall also include separate perspective sketches of the entire system and its major components and structure, showing the usage location of each material within the description. Where applicable, strength conditions (e.g. specific temper, age, anneal) and method of manufacture (e.g., fiber placement, resin transfer molding, etc.) shall be noted. The report shall describe the method of fabrication and assembly of major components, particularly cocured or cobonded composites and welded metal joints. Adhesive systems shall be specified (e.g. bonded construction, bonded studs, bonded nutplates). Each material shall be identified with the corresponding material specification, cross-referenced to military or industry specifications, and process specification, where applicable. Blocks 12 and 13: Submit initial report 90 days after contract award. Make subsequent submissions every 6 months. Block 14: All data shall be delivered to all addressees identified in Block 14 in electronic media and format compatible with Microsoft Office 2007 for Windows. Unclassified data accepted via the Government Team SharePoint VWE/CDE per the Statement of Work (SOW) constitutes delivery and individual addressing is not required. All changes made since the previous submittal of the document shall be marked (e.g. revision history and revision bars).</p> <p>This test plan shall be prepared for all work contemplated and updated as changes occur. This test plan encompasses any research and development, testing, and fabrication studies accomplished during this program with respect to materials and processes. This testing shall include, but not be limited to, work performed for the evaluation of material properties, nondestructive test accept/reject criteria, processing effects and parameters, fabrication techniques, and manufacturing procedures. This test plan shall include descriptions of specific objectives; test methods, procedures, and conditions; and test matrices. This plan shall also document the design allowable philosophy used with regard to the data that will be generated.</p> <p>The plan shall discuss methods used to substantiate material properties by using an appropriate combination of recognized and standardized documentation, analyses, tests, and inspections to characterize properties such as the following: static strength; fatigue strength; modulus; effect of stress concentrations; fracture toughness; crack growth; impact resistance; effects of defects; resistance to environmentally-assisted cracking; wear; general corrosion; pitting; stress corrosion cracking; exfoliation; galvanic corrosion; crevice corrosion; filiform corrosion; moisture absorption; chemical, solvent, fuel, and lubricant exposure; hydrolytic instability; thermal exposure; electromagnetic compatibility; and erosion. The plan shall also discuss methods for substantiating the effects of environmental exposure and operating environment on material properties.</p> <p>The test plan shall relate the scheduling of characterization, testing, and analysis to critical path milestones such as Preliminary Design Review. The schedule shall also detail how this testing and evaluation supports the building block approach (coupon, element, sub component). Rationale for using approaches other than the building block approach shall be documented.</p> <p>The plan shall describe the implementation of procedures used for monitoring and controlling processes critical to satisfying part design requirements. The methods for identifying, monitoring, controlling, and analyzing key process parameters shall be discussed. The plan shall also describe the determination of process capability, including management and reduction of process variation.</p> <p>Blocks 10, 12 and 13: Submit initial report 120 days after contract award. Make subsequent submissions every 6 months. Revisions are due 30 days after receipt of Government comments.</p> <p>Block 14: All data shall be delivered to all addressees identified in Block 14 in electronic media and format compatible with Microsoft Office 2007 for Windows. Unclassified data accepted via the Government Team SharePoint VWE/CDE per the Statement of Work (SOW) constitutes delivery and individual addressing is not required. In addition, deliver one electronic (e.g. CD ROM) and one paper copy of any classified information to PMA 234.</p>						AIR-4.3.4		1	1	0

CONTRACT DATA REQUIREMENTS LIST (CDRL) (1 Data Item)						Form Approved OMB No. 0704-0188			
The public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please do not return your form to the above organization. Send completed form to the Government Issuing Contracting Officer for the Contract/PR No. listed in Block E.									
A. CONTRACT LINE ITEM NO.		B. EXHIBIT A		C. CATEGORY: TDP _____ TM _____ OTHER MISC

16. REMARKS Block 4: Contractor format is acceptable. This report shall be a standalone document containing material property data. Therefore, revisions to this report shall be submitted as updates of the entire report. All changes made since the previous submittal of the document shall be marked (e.g. revision history and revision bars). This report shall document the description, including specific objectives; test methods, procedures, results; and conclusions, of any research development, testing, engineering analyses and fabrication studies accomplished during this program in the area of materials and processes. This documentation shall include, but not be limited to, material property evaluation, nondestructive test accept/reject criteria, processing effects and parameters, fabrication techniques, and manufacturing procedures. The results of any testing proposed in the Materials and Processes Substantiating Data and Analysis Test Plan shall be included in this report. Areas to be covered in this report shall include, but not be limited to, test methods used to develop design allowables, environmental and operational effects on material properties, test results and how the results are used to develop the design allowables, and the data and analyses substantiating compliance with applicable design requirements. This report shall also include data and analyses to substantiate the use of existing material property values from MMPDS and sources other than MMPDS. The data shall be presented in a manner similar to the presentation in MMPDS and the source of the data shall be identified. Blocks 10, 12 and 13: Submit initial report 7 months after contract award. Make subsequent submissions every 6 months. Revisions are due 30 days after receipt of Government comments. Block 14: All data shall be delivered to all addressees identified in Block 14 in electronic media and format compatible with Microsoft Office 2007 for Windows. Unclassified data accepted via the Government Team SharePoint VWE/CDE per the Statement of Work (SOW) constitutes delivery and individual addressing is not required. 16. REMARKS Block 4: The Loads Analysis Report shall incorporate the following two sections: Flight Loads Section This report shall include references to detailed aerodynamic and other data used to determine the magnitude and distribution of aerodynamic loads. MIL-STD-8591 augmented by CFD, wind tunnel testing, and captive carriage 6DOF analysis shall be used to meet aircraft store flight loads requirements. This report shall present at least the following information: a. List of weights, speeds, altitudes, attitudes, load factors, variable geometry configurations, useful load distributions, and other pertinent conditions that were investigated with sufficient amplifying information to show that such investigations adequately covered all critical loads. b. The basis for selection of the design load conditions, including discussion of design features affecting loads, parametric analyses, and loads trend data sufficient to provide a foundation for the validity of the selected conditions. c. Comparative tabulated values and curves of loads, shears, bending moments, and torsions showing the more critical nature of one condition versus another. d. Details of analyses methods with sample calculations, as appropriate. Ground Loads Section This report shall present those loads resulting from all static and dynamic ground loading conditions. For takeoff and landing conditions, all loads and structural responses shall be determined by dynamic analyses. All other ground loads shall be determined by static load analyses or by other rational methods. MIL-STD-8591, augmented by captive carriage 6DOF analysis, shall be used to meet aircraft store ground loads requirements. This report shall also contain the following: a. List each of the specified takeoff, landing impact, and ground handling conditions with sufficient amplifying information to show that such an investigation adequately covers all critically applied external static and dynamic loads as well as airframe response loads. b. Results of parametric studies in graphical form to show the variation on externally applied loads and airframe response loads caused by varying critical parameters, such as sinking speeds, airplane weight and weight distribution, attitudes and angular velocities, rough terrain contours, etc. c. Time histories of external loads, response loads, and motions for all critical dynamic loading conditions and tabulation of maximum dynamic and static loads. d. Time histories of response loads, such as bending moments, shears, and torsions, with tabulation of maximum response loads. e. Amplifying information and discussion to substantiate the criticality of conditions presented in a, b, c, and d, above. f. Equations used for determining static and dynamic loads. The dynamic analyses shall include the following: 1. The critical elastic modes of vibration 2. The dynamic response characteristics of the store 3. Aerodynamic and inertial loads Blocks 12 and 13: Initial submittals of the Loads Analysis Report are due 60 days prior to PDR. Submit final report 30 days after receipt of Government comments. Block 14: All data shall be delivered to all addressees identified in Block 14 in electronic media and format compatible with Microsoft Office 2007 for Windows. Unclassified data accepted via the Government Team SharePoint VWE/CDE per the Statement of Work (SOW) constitutes delivery and individual addressing is not required. 16. REMARKS Format 1 Instructions: 1. Contract Work Breakdown Structure (CWBS) elements shall be reported in accordance with the CWBS CDRL, except for the following: a. When the budgeted value of a Level three CWBS element budget exceeds 20% of the Contract Budget Baseline (CBB) then such element will be reported at a lower level where none of the lower reporting elements exceed 20% of the CBB. b. When the budgeted value of a Level three CWBS element is less than 1% of the CBB then the element shall be reported at Level two, not subdivided into its Level three components. 2. Format 2 Instructions: Use organizational categories, e.g., Integrated Product Team (IPT) or functional including each major subcontractor that satisfied EVMS flowdown requirements. Format 2 shall follow reporting conventions in paragraph 4.a.(1)(a) through 4.a.(1)(b) substituting applicable organizational levels for CWBS levels. 3. Format 1 and Format 2 Instructions: Reporting levels will be reviewed periodically, and may be adjusted by contract modification with no change to the contract price. 4. Format 3 Instructions: Significant differences (absolute values exceeding +/- 5%) between the Performance Measurement Baseline (PMB) at the beginning and end of each specified period shall be explained in Format 5. 5. Format 4 Instructions: a. The contractor's estimate-to-complete projections shall be used for time phasing equivalent staff months for each organizational category specified in Format 2 and include staffing for effort performed by each Intercompany Work Organizations. Staffing for subcontractors that have an EVM reporting requirement will be included in the appropriate Format 2 organizational category. b. (b) Significant changes that require explanations in Format 5 are those that change the absolute value of the projected total staff-months at completion of any organizational or functional category by more than +/-5%. 16. REMARKS Format 5 Instructions: 1. Problem analyses and narrative explanations shall be required for Format 1 elements when cost/schedule variances fall within the following categories: a. 5 largest current cost variances exceeding +/- \$100K or +/- 5% where $CV\% = CV(Cur)/BCWP(Cur) \times 100$ b. 5 largest current schedule variances exceeding +/- \$100K or +/- 5% where $SV\% = SV(Cur)/BCWS(Cur) \times 100$ c. 5 largest cumulative cost variances exceeding +/- \$250K and +/- 5% where $CV\% = CV(Cum)/BCWP(Cum) \times 100$ d. 5 largest cumulative schedule variances exceeding +/- \$250K and +/- 5% where $SV\% = SV(Cum)/BCWS(Cum) \times 100$ e. 5 largest variances at completion exceeding +/- \$250K and +/- 5% f. Other cost and schedule variances or technical performance issues that are causing or are likely to cause significant schedule delays or cost overruns. 2. Narrative explanations required and variance thresholds will be reviewed periodically, and may be adjusted by contract modification with no change in contract price. 3. Schedule variance narratives shall identify significant missed milestones, impact to major milestones, and expected recovery dates. 4. If there are no changes to the reportable element problem analysis, expected impacts, or corrective action status then specify, "no changes since the last reported analysis" and reference the CPR date when the narrative was reported. 5. If the program has implemented an Over Target Baseline, calculate variances since the most recent OTB vice program inception. CPRs required from subcontractors shall be provided electronically using the ANSI X12 Transaction Set 839 4010 specification or the XML equivalent.						b. ADDRESSEE See Block 16		b. COPIES

16. REMARKS Block 4: The Prime contractor shall include all subcontractor detailed schedules that depict significant and/or critical elements, tasks, interfaces, dependencies and program schedule activities commensurate with the level of detail in the Prime's IMS. Significant and critical elements are defined as those items which would prevent the system from meeting its operational capability should delays or problems arise. '2.4.1.15 Critical Path': For reporting requirements, near-critical paths are defined as all tasks within 22 total float working days of critical path. '2.4.1.23 Schedule Risk Assessment' (SRA): The number of near-critical paths/milestones or event driving paths to be included in the SRA will be determined by the Government Program Manager on a case-by-case basis. The contractor shall participate in semi-annual SRAs with the Government. The contractor shall also submit results of any other SRAs that are conducted to be in accordance with their company's associated guidance. '2.4.1.24 User Defined Fields': The first IMS submission shall include a Data Dictionary ('User Defined Fields' mapping) deliverable. Any change, post first submission, to 'User Defined Fields' requires re-submittal of the Data Dictionary with the affected IMS CDRL deliverable. '2.5 Monthly Analysis': The first monthly analysis narrative submission shall include the 'Schedule Assumptions' of the IMS. Any change, post first submission, to 'Schedule Assumptions' requires re-submittal of the 'Schedule Assumptions' with the affected IMS CDRL deliverable. At a minimum, all monthly submissions will include a written schedule analysis to identify and document the following variances: • Changes to <i>Critical Path</i> since last submission • Forecast 'Start' and 'Finish' variances of five (5) days or greater, since last submission, for all near-critical tasks starting or finishing three (3) months from the status date • Changes to logic (e.g. logic ties, relationship types, lags, etc.) impacting critical path and/or near-critical paths since last submission • Changes to forecast dates for <i>all IMP Events</i> and major program milestones since last submission • Work around and/or recovery schedules/plans incorporated or changed since last submission, and their associated impacts • Tasks added/deleted since last submission Blocks 10, 11, 12, 13: Within ten working days after authority to proceed the proposal IMS (including TD/EMD items) with necessary adjustments resulting from the source selection process shall be delivered to AIR-4.2.3. The first subsequent submission is due within 12 working days after the close of the first full accounting period following authorization to proceed, all schedule levels. Subsequent submissions are due within 12 working days after the close of the contractor's accounting period, all schedule levels.				AIR-4.2.3		0	1	0

CONTRACT DATA REQUIREMENTS LIST (CDRL) (1 Data Item)					Form Approved OMB No. 0704-0188												
<p>The public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please do not return your form to the above organization. Send completed form to the Government Issuing Contracting Officer for the Contract/PR No. listed in Block E.</p>
